## Mellowhead Download

Mellowhead is a versatile guitar and fx plug-in. There are 10 convolution based speaker cabinets and 10 different pre-amp/tone settings, ranging from clean to brutal distortion, as well as 3 band tone controls. The 5 effects pedals, reverb and cabinet bypass allow further creative shaping of your guitar sound. All of these settings can be manually engaged, or engaged automatically via Mellowhead's Link system. You can also link the 10 speaker cabinets to a selected tonal preset, for example, Link one of the three clean settings to a clean preset and Link all three brutal distortion settings to a brutal preset. Mellowhead is recommended for guitarists and engineers who are looking for a versatile, affordable and easy to use guitar amp/fx plug-in. Mellowhead is suitable for recording, mastering, mixing and live use. The best thing about Mellowhead is that it really is, well, mellow, meaning it does not take itself too seriously. It's a very easy to use plugin and a joy to play around with. For example, you can turn the filters off, and the result is a very clean guitar sound, or turn the filters all the way up and it's a full bodied sound with some nice stereo separation. Mellowhead also has a Link system, where you can link a tonal preset to a speaker cabinet. This way you can set up a preset like, say, an A-minor chord, and link it to a clean preset. Mellowhead is a versatile guitar amp/fx plugin, easy to use. Mellowhead is made by Acoustica, with assistance from the guys at Fishman, Dangerous Music, and the SSL/EQ team. ## System Requirements For Mellowhead:

Peripherals Additional Notes: Cannons and Bombs Each cannon and bomb explosion awards an explosive artifact, which provides a radius of effect. It can only affect nearby enemies. The explosion hits the ground as well, granting a knockdown effect to affected targets. Collecting bombs and/or shooting cannons grant more artifacts. Note that one shot from each cannon/bomb is required to complete a level; however, you can shoot the cannon/bomb repeatedly to increase the number of artifacts. Each shot of a cannon/bomb is worth only one artifact,
