* If you're a beginner, check out _Beginning Photoshop: Windows and Mac_ (published by Wiley) by M. Edwards and A. Lema. It's a short, hands-on tour of the most important aspects of Photoshop, including layers, masks, and the other critical concepts. You don't need to know much about how computers work to use Photoshop. * If you're an intermediate user or you're looking for more advanced capabilities, _Photoshop CS6 for Digital Photographers_ (published by Wiley) by M. Edwards and A. Lema is an in-depth, up-to-the-minute guide to the program. It walks you through hundreds of Photoshop functions, including the most current tutorials, key features, and new, more sophisticated commands. I highly recommend this book for any experienced Photoshop user. * _Photoshop Elements 9 For Dummies,_ by Joe McDonough, shows you how to use Photoshop Elements 9 to work on your images. It's a great place to start if you only need basic retouching and want to explore many of the program's powerful features. I recommend that you keep your computer up to date, upgrade the operating system if you have an older one, and install the latest update for the graphics drivers on your computer. ## Working with Various Formats After you've placed your images on your hard drive, you need to convert them into a format that your computer can read. The most common formats are TIFF, JPEG, GIF, and PNG. Before you save your images, make sure that you've set the file type appropriately. The best way to accomplish this task is to use the Photoshop CS6 Organizer, shown in Figure 4-3. There, on the Files tab, click Organize and then, under Files, click Photo. In the Organizer window that appears, click the Format button to choose the file type. You can also use the Format tool on the Format Painter and Paths tabs to set the file type. This approach saves you the trouble of having to dig through Photoshop to do so. In Photoshop, you can work on any image format natively and then save in that format or export to it. However, in order to do so, you must place the image on a special layer. Because of this, to create a new layer, you must export the image file and use the Create a New Layer command, covered in the next step.

Q: If $\mathbb{Z}_p$ is the only one ring of prime exponent p, prove that $\mathbb{F}_p \cong \mathbb{Z}_p$ If $\mathbb{Z}_p$ is the only one ring of prime exponent p, prove that $\mathbb{F}_p \cong \mathbb{Z}_p$. Not a homework exercise, but something I came across while reading Fundamental Theorems of the Algebraic Numbers about the maximal ideal $\mathbb{Z}_p$. I've tried to identify $\mathbb{F}_p$ and $\mathbb{Z}_p$ and to identify the homomorphism $\varphi:\mathbb{Z}_p\rightarrow \mathbb{F}_p$ but am stuck there. A: First, note that the structure of $\mathbb Z_p$ is exactly that of an extension field $\mathbb F_p$ of $\mathbb F_p$. Now, suppose $\mathbb F_p$ was not isomorphic to $\mathbb Z_p$. Then we must have $q e p$ such that $\mathbb F_q$ is isomorphic to $\mathbb Z_q$. Since all the other possible prime divisors of p except q are contained in $\mathbb Z_p$, it follows that $\mathbb Z_q$ must be isomorphic to $\mathbb Z_p$ contradicting our hypothesis. So we conclude that $\mathbb F_p\cong \mathbb Z_p$. f - 1 6 2 1 9 4 6 7 * m * * 3 * n * * 2 + 3 * m * * 2 * n * * 2 - 1 5 2 3 2 2 * m * * 2 * n + 3 * m * * 2 - 4 * n * * 2 w r t

What's New in the?

Philadelphia has one of the best bakeries in the country, but there's also a phenomenon sweeping across the whole country – food trucks. They're popping up in big cities everywhere, and here in Philly, there's even a monthly event where we can sample some of the best dishes the city has to offer. Last week, we had the opportunity to see a Smorgasbord at the Fisherman's Wharf event, and they brought a special guest to the scene. Smorgasbord and Oven & Moon owner Ben Levison took some time to talk to us about how he got into cooking, the business, the food, and more. Chris: A big congrats on the expansion! How did you get into it, and how has it been going? Ben: Thanks! I've wanted to be a chef for as long as I can remember. I've always cooked, but I've always had people around that helped me in any way shape or form. I had a friend at [Bachelor of Science] University who took care of my kitchen and living room while I was going to class all at the same time. I worked in high school as an "intern," and I've worked in restaurants since. I went to culinary school at Johnson & Wales in Providence, which is where we opened the restaurant a couple years ago. It's been fun; it's been great. Chris: What's the story behind Oven & Moon? I've been to a couple of events, and I thought I heard you were a Philly guy, but I didn't realize until now! Ben: We have two locations [in Philadelphia, now] and plan on opening one more soon. I lived here all my life, and I was going to have to go out of state to open a location. Then I decided, "hey, why don't I just open one here?" It took us a little bit of time to get going; we tried to do it the slow way. [We] didn't want to pressure ourselves too much and come up with something that's going to be wrong. We were trying to go and hire the right people and the right kind of people that we knew would make the restaurant successful and do it in a way that we know that it's going
