Features Key:

New travel system. In the Lands Between, if you leave your current town, you can freely roam around within a range of the town you visited. This system is designed to avoid having to unlock a map screen for each town, and it allows you to enjoy the game while avoiding a world so large that it becomes hard to explore.

A new multiplayer function. In the current game, monsters appear when you get close to other users playing the online game, and become stronger the closer you get. While traveling with others, monsters would act the same as those in an offline game, and unlike multiplayer in the current game, it allows you to fight together without other players within a specified range.

An offline function. In addition to global multiplayer, you can play the game offline and explore the world entirely by yourself while chatting with others. In the current game, it is challenging to synchronize the game between logged-in and non-logged-in users, so this function has been implemented to allow for this easier.

The new fantasy action RPG is a game that allows you to fight monsters and develop your character while enjoying an overwhelming story in the Lands Between. Come fight in the league of the brave for the glory of Elden!
