For more information, please visit: How to use a variable in a CASE statement I'm just starting out with SQL and I've run into some trouble. I have data in a table that I'd like to keep formatted. I figured I can use a CASE statement to identify

the column to be either formatted as currency or a plain string. I have tried the following code, but it fails. `SELECT DISTINCT column FROM table WHERE ID IN (CASE WHEN [Column] >= 0 AND [Column]`
