OK.Thermally-sensitive reagent-base laccase-cobalt(II) immobilized on crosslinked poly(4-vinylpyridine-styrene) microspheres: catalytic activity and recyclability. The construction of a thermally-sensitive immobilized enzyme reactor using crosslinked poly(4-vinylpyridine-styrene) microspheres (X-PSM) coupled with thermosensitive reagents (beta-naphthylamine and guaiacol) for stabilizing and immobilizing purified laccase (L) was conducted. The immobilized enzyme retained almost 100% of its initial activity at 50 degrees C, but displayed a fast inactivation at 60 degrees C.
