**Matrix Winstar 4 0 Astrology 26**

The number of people in this group seems to be rising very quickly. I would therefore suggest any of you who have read this argument and wish to make a comment that you consider most important to this discussion please do so by using the comment form on my site. You can read more about how this works at the link below: <http://www.astro.net.au/winstar.htm> I have received some other feedback about the support of Astronomer, but I am not going to divulge it at the moment. I have tried to reply to most comments made and will continue to do so. One other thing I must point out is that people do not realize how much time and effort it involves for Matrix to provide support. I myself only have part time work outside of my own software, so even when I do reply to people they seem to not always understand the issues we have to contend with. It is only when I am doing my own testing of their programs that I have a chance to see all their fine software do just fine. So please all, have a little more patience with Matrix and their customers. ===== This is not the official Astrodienst Newsgroup list. This is only an effort to keep the number of messages down to a reasonable size to assist in the design of the Newsgroup. It may be copied and distributed freely. If you have questions, write to Don.Van.Museum@uib.no> or visit the astrodiensthelp page at Astrodienst.net for more help. =====

## Matrix Winstar 4 0 Astrology 26

Bill, Graeme Deaton [http://www.geocities.com/rohamukh/Matrix Winstar 4 64bit 0 107 9.54.00](http://www.geocities.com/rohamukh/Matrix+Winstar+4+64bit+0+107+9.54.00) if you have a problem with astrologers maybe you should look a bit more at your own chart, and see if it holds any points there for negative energy. Graeme Deaton [www.matrixproductions.co.uk](http://www.matrixproductions.co.uk) I have had Winstar for sale for 2 years and not one or two bad reports. I have the same problems with the Windows XP version as I had with WinstarPlus 4. I am not going to put in an explanation as to why it is not upgraded, or why it still does not work. I sell many useful software products also, and my integrity is no greater than anyone else, I have not been an open source purist either like KDE - my products are priced the same, or lower, than the free ones. I do not support Linux only the Win32 products - so don't ask me to like Linux, I have nothing to do with it. Bill About 90% of my products are free and run on all popular operating systems, free vbs and win32 versions are available too if you need any support call Graeme or the Matrix tech support number: Tel +44(0) 1376 793700 I have not seen any computers where I could not install the Winstar4 software as new or with older operating systems. I have had zero bad reports for Winstar 4. Graeme Deaton [www.matrixproductions.co.uk](http://www.matrixproductions.co.uk) Winstar Pro 7.07 (full version only) was released on the 15th November and will now be sold worldwide from Matrix. Some of the bad reports about Winstar have come in the last week. I will provide details of these reports and also a copy of the complaint sent to Matrix. I will comment on these reports later. Graeme Sec8ef588b
