The third version of this graphics editor offers new tools and features, such as a group text tool and new filters for text. The application is also faster and easier to use, with larger fonts. The text functions of Paint.NET 2.0 allows you to use a single, neat tool to edit text and graphics. We have streamlined the interface and added a new tool to create groups for text. Other features include filter text, text measurement and text alignment, and integration with the original Windows Edit.NET font engine. The program has the ability to import files from Clipboard, drag and drop, and can use the original Edit.NET font engine. The library is expanded to include 150 filter icons. The program allows you to modify all aspects of your image's text and graphics, including the color and alignment of text, the size of the font, and the use of shadows and highlights. Key features: - Create text effects: shadow, outline, outline with shadow, glow, drop shadow, reflection, text on image, bevel, font, skin - Text: alignment: center, justify, left, right, top, bottom, center left, center right, text size, spacing - Text decoration: italic, bold, underline, strike through, overline, shadow - Text rotation: none, clockwise, counterclockwise, mirror, rotate left, rotate right, rotate 90 degrees, auto - Text effect colors: highlight, shadow - Create your own text effects - Use text effects as filters - Combine text effects, colors, shadows, highlights, and gradients - Automatically find text in images - Allow you to enter text - Edit text as you type - Select the font type - Use the original Edit.NET font engine - Duplicate text - Cut and paste text - Paste text from clipboard - Paste text from other programs - Convert between Text and Graphics - Import graphics from Clipboard - Auto-fit text to image - Add text to image - Auto-cut text from images - Automatically crop images - Automatically align text - Automatically align image - Automatically rotate image - Automatically resize image - Automatically fit to image - Automatically fit to page - Auto-merge images into one - Automatically align images - Automatically scale images - Automatically create thumbnails - Automatically resize images - Automatically crop images
